Introducing Nox-Rust® Premium Rust Removing Gel

(July, 2012) -- Daubert Cromwell announces the addition of Nox-Rust Premium Rust Removing Gel, a water-based, fast-acting, brush-on rust remover, to its product line of anti-corrosion packaging products.

The proprietary new rust removing gel takes off surface rust from steel, iron and most metal surfaces without scrubbing or sanding. It is acid-free, non-toxic, ready-to-use, and is easy to apply by brush or roller. The thick, non-hazardous gel clings to vertical surfaces, making it ideal for de-rusting large or heavy metal components that are difficult to move.

To apply, brush on a liberal amount of gel over the rusted metal surface. Light rust will begin to break up within 15-20 minutes. When rust is loose, wipe away with a soft cloth or rinse with water. Protect cleaned metal parts and equipment from further corrosion by packaging in Daubert Cromwell corrosion preventive papers, films, bags.

For further information, contact Daubert Cromwell at 800-535-3535, info@daubercromwell.com.

About Daubert Cromwell

Since the 1940s, the Daubert companies have set industry standards in corrosion prevention packaging. Today Daubert Cromwell VCI products are used in automotive, heavy equipment, electronics, military, and fabricated metal markets worldwide. Corporate offices are in USA, Germany, China, and Mexico, with distribution and manufacturing networks in 26 countries
